

Our young and talented team is dedicated to finding the most economical and sustainable solution for the design of load-bearing structures in concrete, wood, and steel construction, as well as the creation of formwork and reinforcement plans for the benefit of our clients and the environment.

To strengthen our team in Istanbul, we are currently looking for a

STRUCTURAL ENGINEER (m/f/d)

Your Responsibilities:

- Independently create verifiable, structural calculations
- Provide technical guidance to our clients, builders, and architects
- Generate construction plans
- Coordinate and execute projects
- Monitor project construction

Your Profile:

- Successful completion of an engineering degree (with a focus on civil engineering/structural engineering)
- Professional experience is desirable but not mandatory
- Strong spatial visualization skills
- Reliable and self-motivated
- Proficiency in CAD software (preferably Allplan) and calculation programs (preferably RFEM and Frilo)

We offer you interesting and challenging tasks in the field of structural planning within a collegial working atmosphere, along with long-term career prospects and fair compensation. If you find this job description appealing and suitable, we look forward to receiving your application.

Please send us your comprehensive application documents via email directly and confidentially to info@edita-eng.com. By submitting your application, you consent to the processing of your data.
